### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 03 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 11 March 2005.
- 2a) ☒ This action is **FINAL**.                      2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Morikawa (US 6,686,848 B1) as set forth in the previous Office Action dated 12/13/2004.

*Response to Arguments*

3. Applicant's arguments filed 03/11/2005 have been fully considered but they are not persuasive.

The applicant argued that Morikawa finds no mention of any one of multiplexer allocating identification information to each of the picture signals received from the cameras, a number of available identification is twice or more than the number of the cameras, a plurality of proper identification bits and corresponding plurality of auxiliary bits, characterized in that the proper identification bits identify which camera generated a corresponding picture signal, pages 2 and 3 of the remarks.

The examiner respectfully disagrees with the applicant. It is submitted that multiplexer (18a of fig. 1, e.g. the function of multiplexer (18a) has time division for multiplexing the image signal of each camera based on the identification information of the camera (predetermined time lapse, codes, addresses) allocating identification information to each of the picture signals received from the cameras, a number of available identification (8 bits for data signal, an address "000" as well as a category code "0001", col. 3, line 61-col. 4, line 8) is twice or more than the number of the cameras (each camera has a code, each code has more than two numbers that are more than number of the cameras, see fig. 1), a plurality of proper identification bits (8 bits image) and corresponding plurality of auxiliary bits ("0000, 0010" comprises "0000" as considered auxiliary bits, and "0010" as considered identification bits, a category code), characterized in that the proper identification bits ("0001") identify which camera generated a corresponding picture signal, wherein the identification bits are multiplexed into the image and

then recorded on the VCR (col. 3, lines 45-56). In view of the discussion above, Morikawa anticipates the claimed features.

### ***Conclusion***

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
